

UAV Surveys & Applications

- | Unmanned Aerial Vehicle Surveys
- | Real time surveillance
- | Increased control and accuracy
- | High quality digital terrain models
- | Digital Photography / Video
- | CASA Certified Operator

Services

Jensen Bowers is committed to providing the highest level of technologically advanced geospatial solutions to the many markets we serve. We offer UAV solutions that enable photography and traditional surveying to be completed on site in a single day. Together with photogrammetric software, we can generate 3D mapping of a site to a suitable accuracy, leading to invaluable, high quality, topographical data.

How We Can Assist

Jensen Bowers provides comprehensive surveying services including:

- Digital Elevation Models (DEM)
- Environmental & Agricultural Mapping
- Volume Calculations
- Infrastructure Inspections
- Sales & Marketing Imagery
- Photography / Video
- Large Area Rectified Orthophotos.

Recent Project Experience

- Redbank Mototway Estate - Goodman
- Ashgrove Golf Course
- Rochedale Motorway Estate - Goodman
- Shoreline Development - Shoreline Redlands

Benefits

- Smart technology - safe, fast and accurate
- Cost-effective
- Survey of unsafe and inaccessible areas
- JB is a participating member of the 'Safety Leadership at Work Program'
- Multi-purpose photography and video.
